PROFESSIONAL EXPERIENCE:

Oxiliry || Software Engineer — Nov'22 – Current

- Planned and designed software architecture and user interfaces.
- Converted UI/UX designs into functional, responsive frontend code aligned with project requirements.
- Improved performance and optimized existing software systems.
- Identified and resolved bugs to ensure smooth application functionality.
- Collaborated with cross-functional teams for integrated solution delivery.
- Conducted thorough testing to ensure reliability and quality.
- Managed deployment processes to ensure smooth production releases.
- Pursued continuous learning to stay updated with the latest industry trends and best practices.

Oxiliry || App Development Intern — June'22 – Oct'22

- Gained hands-on experience under mentorship and project guidance.
- Explored and worked with new technologies and frameworks.
- Maintained clear communication with team members and supervisors.

Geekistan || Web Development Intern — Mar'21 – Sep'21

- Supported the web development team with various tasks and feature implementations.
- Contributed in team meetings and collaborative sessions.
- Developed assigned features and functionalities within web applications.
- Created documentation for code, processes, and project information.

EDUCATION:

Mehran University of Engineering and Technology — Class of 2022

B.E - Computer Systems Engineering

Final Year Project:

Project Title: IoT-based Health Monitoring System

Developed a real-time patient monitoring system using IoT sensors and cloud technologies to enable continuous health tracking and timely alerts.

TECHNICAL SKILLS:

- **Frontend**: React.js, Javascript, Typescript, HTML, CSS, jQuery.
- **Backend**: C#, ASP.NET, ASP.NET WebForms, ASP.NET Core MVC, ADO.NET.
- **Database**: SQL, MySQL.

SOFT SKILLS AND INTERESTS:

- **Soft Skills:** Leadership, Problem-Solving, Teamwork, Stakeholder Management, and Project Management.
- **Interests:** Driving, Music, Video Gaming, and Fitness.
